CADTALK

Integrate Intelligently℠

Transform CAD BOMs to SYSPRO Manufacturing Structures, Routings, and BOMs

100,000+ Bill of Materials Processed Per Year with CADTalk. That number is growing every year.

CAD, PDM, PLM SYSTEMS

All These & Many More

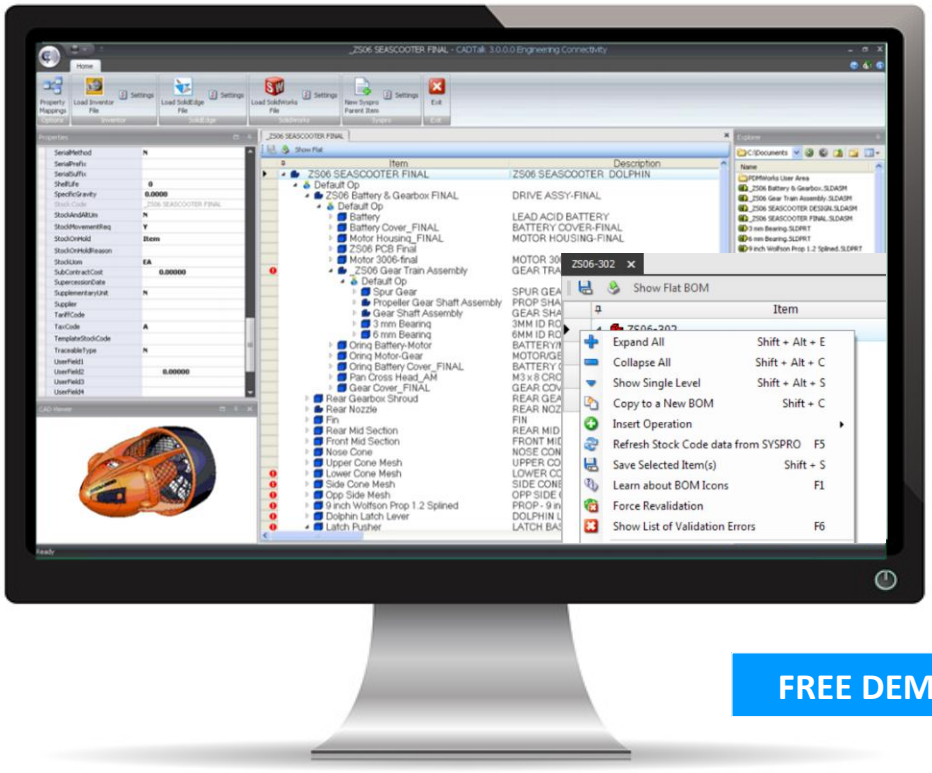
AUTODESK AUTOCAD · SOLIDWORKS · creo · OrCAD · agile · HEXAGON PPM · CATIA · AUTODESK INVENTOR · windchill · Bentley MicroStation · AUTOCAD ELECTRICAL · SOLID EDGE · Microsoft Excel · arena

"With CADTALK, I can start with a brand-new engineering design and have all of that data translated into SYSPRO in a matter of minutes. No more waiting for the system to be updated!"

FASTER BOM CONVERSION – GUARANTEED!

CADTALK transforms the engineering bill of material from virtually any CAD, PDM, or PLM application into manufacturing structures and routings as well as bills of material inside SYSPRO in a matter of minutes saving you time and reducing data entry errors. It can even create or update stock codes and inventory records saving you even more time and effort, so you can focus on what you do best – designing great products.

CADTALK is unlike any other software on the market with powerful and flexible rules to transform the engineering bill of materials into a fully-functional routing and bill of materials inside your SYSPRO system. This isn't just a data sync but rules to setup the manufacturing structures and routing and bill of materials exactly the way you need it for costing, scheduling, and production.



Key Benefits

- Faster SYSPRO BOM creation (80% faster on average)
- Reduce purchasing mistakes
- Automatic creation of new stock codes and inventory records
- Rules-based manufacturing routing creation
