Arena–CADTALK Integration for SOLIDWORKS
Automate Design Processes for Accuracy

OVERVIEW

Most product companies share a common struggle—managing and releasing design data from engineering teams to the rest of the company. Painful manual processes contribute to team dissatisfaction and disconnected data silos, resulting in a lack of visibility and collaboration and, ultimately, poorer product decisions. Facilitate better collaboration between your teams and get better products faster with an automated integration between Arena PLM and SOLIDWORKS®. The CADTALK Integration for SOLIDWORKS provides a seamless, accurate bidirectional flow of information between SOLIDWORKS and Arena for prototype, new product introduction (NPI), and ongoing product development processes.

CONNECT THE MECHANICAL DESIGN PROCESS TO THE FULL PRODUCT RECORD

Collaborating with today's dispersed design teams introduces risk when moving from team-level engineering design to the larger released product record and manufacturing. Design teams utilize SOLIDWORKS work-in-progress (WIP) tools to ensure engineers do not step on each other's toes during early design. Once the individual designs are mature enough, they need to be incorporated into the full product design with other mechanical, electrical, software, and documentation components. With CADTALK Integration for SOLIDWORKS, teams have an automated and easy process that reduces errors and accelerates the NPI process.

HOW IT WORKS

The CADTALK Integration for SOLIDWORKS provides design teams with the ability to create and publish parts, BOMs, and files from within SOLIDWORKS to Arena. SOLIDWORKS users publish the engineering BOM and configurable file types such as PDF, STEP, or CAD data to Arena. All integration activities can be accessed on demand through the SOLIDWORKS files both with and without PDM or directly from PDM with a headless automated service.
BENEFITS

✓ **Faster Innovation**
- Ensure operations team feedback early in the design process, in support of design for manufacturing (DFM) framework
- Provide the information necessary for accurate and responsive sourcing

✓ **Process Simplification and Standardization**
- Reduce onboarding and training time by removing the need to learn how to duplicate same or similar tasks in multiple systems
- Support business needs with configuration options for publishing part data based on design scenarios
- Maintain a consistent and controlled complete product record for the entire organization and supply chain

✓ **Reduced Product Delays and Costs**
- Eliminate the risks of data entry errors
- Ensure everyone is working from the same, most current product record and associated files

Publish Options

- Publish action triggered by any SOLIDWORKS PDM workflow with headless automated service

- On-demand publishing directly from SOLIDWORKS or stand-alone host

- Open the part in Arena directly from inside SOLIDWORKS or from the stand-alone host

Publish Items and BOMs

- Publish a new part and BOMs from SOLIDWORKS to Arena

- Support of SOLIDWORKS configurations, cut lists, component exclusion and promotion

Publish Files

- Publish derived files (MS Office, PDF, STEP, other configurable file types) from SOLIDWORKS to Arena, associating these file(s) to related parts in Arena

GETTING STARTED

It doesn't matter where you are in your journey with Arena and SOLIDWORKS—you can implement the integration at any time. It is easy to install and configure to support your existing processes. CADTALK, an Arena and SOLIDWORKS partner, provides the integration, installation, and configuration assistance, and customization services as needed along with ongoing product upgrade support for future SOLIDWORKS versions. Contact Arena or CADTALK today to learn more.

ABOUT ARENA

Arena, a PTC Business, helps companies create innovative products that change the world. Arena unifies product lifecycle management (PLM) and quality management system (QMS) processes, allowing every participant throughout product development and commercialization to work together fast and effectively. With Arena, dispersed teams accelerate the design and delivery of quality products. For more information, visit Arena, a PTC Business.

ABOUT CADTALK

CADTALK has provided world-class CAD to ERP and PLM integration and implementation since 2005, with customers throughout the world. With a deep understanding of ERP, PDM, PLM, and CAD software and the challenges facing manufacturing companies, CADTALK provides deep and robust integrations that can be configured for each customer's needs. CADTALK has partnerships with all the major CAD/PDM/PLM vendors. For more information, visit CADTALK.com
